We highly recommend that you register for the free ThoughtSpot U course that covers the material in this section, [Getting Started with ThoughtSpot Analytics Cloud](#).

Step 1: Create a ThoughtSpot Community account

A ThoughtSpot Community account lets you ask questions in our product forums, explore best practices from other customers, sign up for events, and contact support.

[Create a Community account →](#)

Step 2: Activate your ThoughtSpot Cloud account

We will send you an email that contains the administrator credentials to log in for the first time. Check your inbox, then click to access the free trial cluster. Stay logged in to complete the rest of the setup.

When you start using the ThoughtSpot Free Trial, you see the ThoughtSpot password verification checklist. Passwords must meet the following requirements:

8 or more characters.

1 uppercase letter, 1 lowercase letter, 1 number, and 1 special character.

No blocked words: username, display name,

Pass a complexity and uniqueness test by checking for known patterns and words. ThoughtSpot rejects passwords that are not complex enough.

For more information, see the [Dropbox password library](#).

Step 3: Connect to your data source

Completing this step lets all users in your organization perform live queries. Choose your cloud data warehouse type, and follow the connection instructions.

[Join tables →](#)

Step 5: Create a worksheet

Worksheets make it easier for everyone in your organization to search data and create visualizations. Use the following step-by-step instructions to create your first worksheet.

[Create and use worksheets →](#)

Step 6: Learn search essentials

After you finish creating worksheets, you are ready to search. Review the key concepts to get started, and how to help others in your organization become effective searchers.

About ThoughtSpot

ThoughtSpot is the Modern Analytics Cloud company. Our mission is to create a more fact-driven world with the easiest to use analytics platform. With ThoughtSpot, anyone can leverage natural language search and AI to find data insights and tap into the most cutting edge innovations the cloud data ecosystem has to offer. Companies can now put the power of their modern data stack in the hands of every employee, extend the value of their data to partners and customers, and automate entire business processes. ThoughtSpot's web and mobile applications improve decision-making for every employee. With ThoughtSpot's low-code development platform, customers can also embed consumer-grade analytics into their SaaS offerings or build entirely new interactive data apps that engage users and keep them coming back for more. Organizations like Walmart, BT, Daimler, Medtronic, Hulu, Royal Bank of Canada, Nasdaq, OpenTable, Metromile, Workato, and Nationwide Building Society rely on ThoughtSpot to transform how their employees and customers take advantage of data. See for yourself and try ThoughtSpot today.
